ABOUT ME

I graduated in **Computer Engineering** from **Akdeniz University**, where I **developed and published end-to-end web applications with a focus on both front-end and back-end technologies**, applying modern software engineering practices in academic and personal projects.

Currently, I work as a **Software Engineer at Atmosware, a Turkcell Group Company**. I build **scalable, user-friendly web applications using technologies like Next.js, vanilla CSS, Ant Design**. I contribute to Turkcell AI projects by participating in front-end development, architectural setup, as well as DevOps and deployment processes.

In addition, I serve as a **Scrum Master to improve workflows and support agile process efficiency**. I am passionate about building user-focused, high-performance, and sustainable software solutions.

WORK EXPERIENCE

Turkcell Group Company Atmosware

Software Engineer

[08/2024 – Current]

I played an active role in the **end-to-end development processes of Turkcell's artificial intelligence projects**. I developed interfaces using **Next.js and pure CSS**. I contributed to establishing the project's **architectural structure and took responsibility for DevOps processes and deployment operations**. I am still actively working on the project.

In addition to my current software engineering responsibilities, I also take on the role of **Scrum Master to improve internal team processes and ensure effective implementation of agile methodologies**.

OptiWisdom

Machine Learning Intern

[07/2023 – 11/2023]

I worked on a **machine learning** project on **Customer Buying Behavior Prediction** and **wrote a paper** about it at the end of the internship.

EDUCATION AND TRAINING

Computer Engineering

Akdeniz University [2020 – 2025]

City: Antalya

Turkcell GYG 3.0 Frontend Bootcamp

Turkcell [03/2024 – 06/2024]

Link: <https://github.com/necatidogrul>

I completed a three-month project-based training course in **JavaScript, React, Next.js, pure CSS** and CSS libraries. I developed projects in which I took an active interest in **every aspect of the front-end**.

SKILLS

Next.js / React / TypeScript / JavaScript / CSS / Tailwind CSS / Redux / Git / Docker / Node.js / MongoDB

PROJECTS

[05/2025 – 06/2025]

necatidogrul.dev

I developed my personal website **in accordance with UI/UX design principles**, using **Next.js, Shadcn** and **Tailwind CSS**. It features **multi-language support** and **dark mode**.

Link: <https://www.necatidogrul.dev>

[03/2025 – Current]

RaporApp

I developed the web application “**RaporApp**” using **Next.js, Tailwind CSS, Shadcn, Radix UI** and **Firebase** technologies. It allows users to **create customisable PDF reports**. For this project, I combined **modern front-end tools with user-oriented design principles to create an aesthetically pleasing and powerful reporting experience**.

Hotel Management using Angular

I built a hotel management application using Angular for the Advanced Web Programming course project at my school. In this application, customers can be added, reservations can be made and necessary validations can be done interactively with the backend using the project's API.

E-commerce Website Layout named Organic

As a project in Turkcell GYG 3.0 Frontend Bootcamp, I created an e-commerce site that sells "Organic" products using HTML, SCSS and Bootstrap.
